MARKET PRICE				-0.48%					
NAV				-0.75%					
INDEX									

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Funds may be lower or higher than the performance quoted. All performance is historical and includes reinvestment of dividends and capital gains. Performance data current to the most recent month end may be obtained by calling 1-844-ETF-MGRS (1-844-383-6477). Market returns are based on the midpoint of the bid/ask spread at 4 p. m. ET and do not represent the returns an investor would receive if shares were traded at other times. Performance is annualized for periods greater than 1 year.

Holdings are subject to change.

¹Income is expressed as the result of dividing net securities lending income divided by the average daily net assets of the Fund for the same period.

ABOUT THE FUND

The Rogers AI Global Macro ETF seeks to provide investment results that, before fees and expenses, correspond generally to the total return performance of the Rogers AI Global Macro Index.

ABOUT THE INDEX

The Index tracks the performance of U.S.- listed single-country ETFs that each track a broad-based index composed of equity securities primarily listed on an exchange in the applicable country. Additionally, the Index will include an allocation to an ETF tracking the 1-3 year U.S. Treasury Bond market, which will be added to at times when the investment model determines to reduce or eliminate exposure to a country. From time to time, the Index may be significantly allocated to the Treasury ETF. The Index is rebalanced monthly and each country weight is capped at 10% at the time of rebalance.

THE POWER OF BIKR AI

The allocation of each single-country ETF in the Index is based on a proprietary artificial intelligence-driven algorithm that analyzes macroeconomic data (e.g., volatility, interest rates, productivity, gross national product) monthly to identify likely changes in market directions in individual countries and within the global economy. The algorithm uses objective data to calculate the magnitude and probability of such market movements over an approximately 18-month period, while also seeking to identify any "micro-cycles" that might develop in shorter time periods, to determine the optimal investment allocations.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's prospectus, which may be obtained by calling 1-844-ETF-MGRS (1-844-383-6477), or by visiting www.bikretf.com. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV and are not individually redeemed from the Fund. Brokerage commissions will reduce returns.

The Fund will incur higher and duplicative expenses when it invests in other investment companies such as ETFs. There is also the risk that the Fund may suffer losses due to the investment practices of the underlying funds. When the Fund invests in other investment companies, the Fund will be subject to substantially the same risks as those associated with the direct ownership of securities held by such investment companies.

To the extent the Fund invests a significant portion of its assets, directly or indirectly, in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region. Returns on investments in foreign stocks could be more volatile than, or trail the returns on, investments in U.S. stocks.

The Fund relies heavily on proprietary quantitative models as well as information and data supplied by third parties. Models may have aspects that are predictive in nature. The use of predictive models has inherent risks.

The Fund is distributed by ETFMG Financial LLC, which is not affiliated with Ocean Capital Advisors, LLC.
